

Memories, Natural History & Community of Knight's Hill Woods and Tivoli Park

This booklet has been developed to highlight the historical background, flora and fauna of Knight's Hill Wood and Tivoli Park.

In order to preserve their inherent qualities and richness, the charity Nature Vibezz believes it is essential not only to understand something of the area's history, but also to document its current biodiversity and the community that engages with it: everyone from regular park users and local residents, to nature lovers and anyone simply passing through.

We feel this is especially important at a time when families in urban areas are increasingly disconnected from nature. In comparison to previous generations, many young people have far less freedom to explore, play and roam. Not only do they have fewer opportunities to reach wild places beyond the cities where they live, but are not even discovering the natural world on their doorsteps.

"Expand your mind, connect with Nature"

Nature Vibezz
is a UK Registered Charity
providing Forest School, Environmental Education and
Practical Nature Conservation sessions, programs, events
& community projects.
